TIMELESS BEAUTY BEGINS
WITH THE PRECISION
OF SWISS TECHNOLOGY.

THE
POWER
OF PSP®
PROTEINS

DISCOVER THE POWER OF PSP®
FOR TIMELESS BEAUTY TODAY!

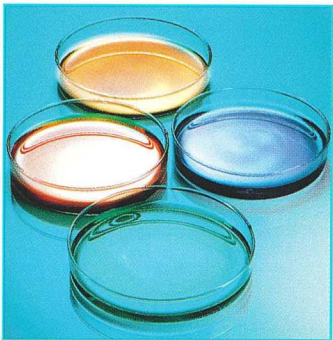

THE PRECISION OF SWISS TECHNOLOGY.

Nestled among the spectacular beauty of the Swiss city of Lausanne, is the prestigious University Hospital. Originally established in the thirteenth century, today, the University Hospital of Lausanne is a leading international research facility in medicine, and the birthplace of modern Swiss innovation.

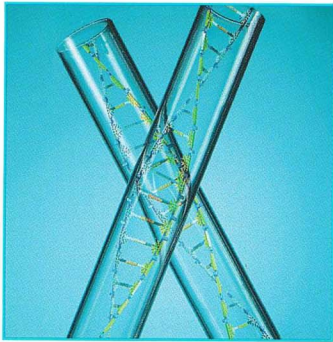

THE QUEST TO HEAL.

Through years of intensive research on scarless wound healing, physicians discovered the unique ability of fetal skin to heal without scarring. Inspired by this phenomena, medical researchers at the University Hospital of Lausanne created a biotechnology process to obtain the rich proteins responsible for scarless wound healing from cultured fibroblasts.

UNPARALLELED INNOVATION.

A dedicated cell bank was established for developing new skin treatments using a single donation of fetal tissue under the strict legal and ethical laws of Switzerland. Originally established for wound healing and burn treatments, this same cell bank provides a lasting supply of fibroblasts for producing PSP®, a proprietary skincare ingredient exclusive to **NEOCUTIS**.

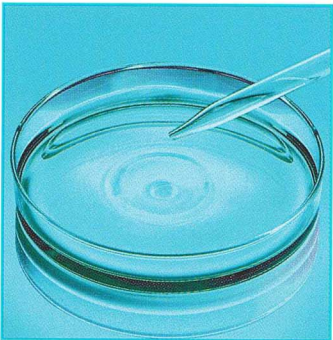

BRINGING THE POWER OF MEDICAL RESEARCH TO SKINCARE.

Discovered through years of medical research conducted for wound healing and burn treatments, PSP®, Processed Skin Cell Proteins, is an exclusive and proprietary skincare ingredient developed by leading Swiss researchers and available exclusively in **NEOCUTIS** skincare products.

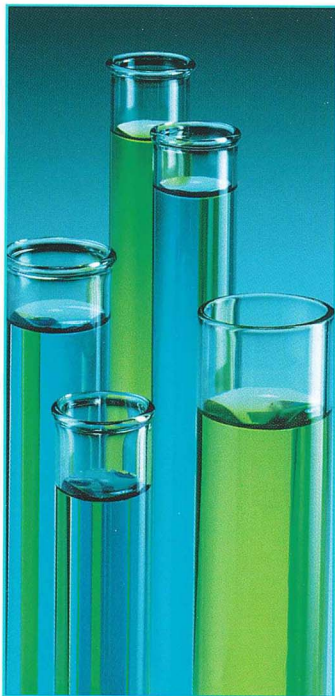

THE BEAUTY OF INNOVATION.

PSP® is the newest generation of an optimal, naturally balanced blend of proteins which include Human Growth Factors, Cytokines and Interleukins for beautifully ageless skin. Laboratories worldwide have long recognized the restorative power of proteins in skin rejuvenation. Now, you can experience the potent anti-aging effect of proteins with PSP®!

THE NEOCUTIS COMMITMENT TO PRECISION.

The purity and high quality of PSP® is ensured through the exclusive technology and manufacturing process, conducted in accordance with Good Laboratory and Manufacturing Practices for production of biotechnological products.

TIMELESS BEAUTY BEGINS WITH PSP®.

NEOCUTIS, a leader in innovative, effective skincare, brings the precision of Swiss technology and cellular therapy research together for scientifically advanced breakthroughs in skincare.

PSP® is an exclusive and proprietary ingredient to **NEOCUTIS**. PSP® has been clinically demonstrated effective in peer reviewed, published clinical studies which show the effectiveness of PSP® in:

- Skin rejuvenation.
- Post-procedure skincare.
- Care of sensitive, stressed and irritated skin.

THE SCIENCE OF SKINCARE.

All **NEOCUTIS** products are formulated with a blend of science and Swiss technology to enhance skin's natural beauty. Each product helps diminish the visible signs of skin aging and soothes stressed, irritated skin.

IMPORTANT SAFETY INFORMATION:

BLANCHE Skin Lightening Cream (Hydroquinone USP, 4%) is contraindicated in people with a history of hypersensitivity, allergy, or intolerance to this product, Hydroquinone or any of the other ingredients. The safety of topical Hydroquinone use during pregnancy or in children (12 years and younger) has not been established. Mild to moderate redness, peeling, burning, dryness or itching may be experienced. In clinical trials, the most frequently reported side effects of topical Hydroquinone are erythema, desquamation, burning, dryness and itching pruritus. This product contains sulfites that may cause severe allergic reactions including anaphylactic symptoms and life-threatening asthma attacks. BLANCHE Skin Lightening Cream contains Hydroquinone, which may produce exogenous ochronosis, a gradual blue-black darkening of the skin, whose occurrence should prompt discontinuation of therapy.
