

## ThermiTight Informed Consent

I request and authorize Dr. Folk / Dr. Bateman, Tula Caputto PA-C, Jill White PA-C, or designated person, to perform a procedure on me known as: Subdermal Skin Tightening and Sculpting utilizing temperature controlled Radio Frequency technology.

This procedure is being used to treat my condition/medical diagnosis of: \_\_\_\_\_

Areas to be treated: \_\_\_\_\_.

### **Please initial each item:**

\_\_\_\_\_ The areas for treatment have been reviewed with me today and I am in agreement. I have been thoroughly and completely advised regarding the objectives of the procedure. I understand that the practice of medicine and surgery is not an exact science and although these procedures are effective in most cases, no results have been guaranteed. I acknowledge that imperfections might ensue and that the operative result may not live up to my expectations. I understand that skin tightening may not be fully apparent for 6-12 months after this procedure, that tissue tightening varies from individual to individual and results are age-dependent.

\_\_\_\_\_ The treatment will involve applying heat to the adipose (fat) tissue and dermis using radiofrequency for therapeutic purposes.

\_\_\_\_\_ I am aware of the following possible experiences and/or risks associated with the procedure:

- I consent to the administration of local and tumescent anesthesia. I understand that all forms of anesthesia involve risks and the possibility of complications, injury, or death.
- Discomfort may be experienced during and/or after the treatment.
- Some bruising and/or swelling may occur following the procedure. However, it should resolve in days, weeks, or months.
- Temporary redness (erythema) of the treated area can occur.
- Scarring is rare, but is a possibility if the skin surface is disrupted.
- Although uncommon, burns can occur.
- Infection is rare, but should it occur, treatment with antibiotics and/or surgical intervention may be required. Infection can further increase the risk of scarring. Proper wound care is important in the prevention of infection. If signs of infection such as pain, heat, blisters, or surrounding redness develop, call the office immediately.
- I understand the importance of the pre and post treatment instructions and that the failure to comply with these instructions may increase the possibility of complications.

\_\_\_\_\_ I understand that lipoaspiration may be used in conjunction with the Subdermal Skin Tightening and Sculpting treatment, if Dr. \_\_\_\_\_ determines it is necessary to do so. I understand that skin irregularities may occur with any lipoaspiration treatment.

\_\_\_\_\_ I consent to having clinical photographs taken before, during and after my procedure. I understand that these photographs are an important part of my medical record. In addition, I consent to the use of these photographs, without my identity being revealed, for the education of future patients, professional clinical presentations and medical journals.

\_\_\_\_\_ The nature and effects of the procedure, the risks, the ramifications, complications, as well as alternative methods of treatment have been fully explained to me by the physician or designated person and I understand them. I am aware that the use of temperature controlled radio frequency for subdermal skin tightening and sculpting has not been approved by the FDA. The benefits of the proposed procedure, along with the probability of success have also been discussed with me. I have been given the opportunity to ask questions and have received satisfactory answers. I certify that I have read the above authorization and that I fully understand it.
