

What if there were a treatment  
that slowed the aging process  
and kept your patients looking  
**forever young...**

# Results Forever

A retrospective study<sup>1</sup> by 491 evaluators of eleven patients treated with Forever Young BBL over the past nine years reveals:

- Patients appear not to have aged over the study period.
- Patients look ten years younger than their actual age.

Why is Forever Young BBL unique?

“ Compared to other devices, Forever Young BBL from Sciton has allowed a significant improvement in the FotoFacial® procedure to rejuvenate skin, largely because the technology has been easier to use, it’s faster, and treats with a larger spot size. ”

# A Heritage of Innovation & Quality

Sciton was founded by a team of the laser industry's preeminent engineers and physicists with one mission: To build an aesthetic medical laser of uncompromising quality and reliability. Why? Because Sciton is committed to our customers' success.

- We engineer products that will stand the test of time. Since 1999, over 95% of the systems we have ever made are still in service.
- Our systems are designed to grow with your practice. When the needs of your practice expand, you can upgrade your existing system with new and innovative modules allowing you to offer more treatment options to your patients.
- We want you to be profitable. Our systems have revolutionized the aesthetic laser business model by eliminating the hidden costs of consumables.

All of us at Sciton look forward to partnering with your practice. Our success is your success. Your success is our success.

# Results Now. Results Forever.
