

Omni Recovery Kit

After Halo Laser

Core Recovery Complex - Is a very concentrated growth factor mix that will be applied immediately after your procedure. If there is product remaining (the vial contains 4ml total) apply this to your skin immediately after your first shower. You can draw it up with a needles 1ml syringe. Then cover with your Protective Recovery Balm. Repeat the next days if you still have product left.

Protective Recovery Balm - contains peptides to aid in healing, and can be used as a thin layer to moisturize your lasered skin. You might want to use this for the first 1-3 days.

Omni-Plex spray - Is a mixture of 90 peptides and vitamins, which will also aids in healing and collagen formation. It does sting, so do a test spot before spraying your entire face. This should also be applied immediately after a shower or washing so it can reach the surface of your skin. Consider starting this at about day 3, and can be continued until gone.

Boost Recovery Mask - Is a mixture of growth factors, peptides, and moisturizers. Use this when your skin is completely healed but still dry and tight. Don't waste the goop in the bottom of the package (precious stuff!). You can put this on your neck, chest, or other areas.

Rinseable Azulene Cleanser - can be used to wash your skin. It does contain wheat germ oil.
